How to find a creative solution

Creativity is essential in today's world of stiff competition. Apple i-pod, i-phones, blackberry bold and many such gadgets have made remarkable success because of creative and unique features. It is creativity which makes a particular brand popular. Creativity can boost up your business and therefore results in to increased client base.

General problem solving procedure :

- Recognise the problem
- Do research and investigation
- Chalk out possible solutions
- Study feasibility and end results of each possible solution
- Monitor and evaluate each solution and select the one which solves the problem in best manner

Few key things to be considered in order to have a creative solution :

- Have imagination
- Visualise end product
- Be different - avoid following someone else's approach
- Try to think away from traditional approach
- Challenge the old solutions and try to find something new
- Be open minded
- Welcome feedback from your team
